Staffing & Solutions

A SUTA Solution for Your Business

Integrity Staffing & Solutions offers a solution to companies that are adversely impacted by an increase in their 2010 Nebraska State Unemployment Tax (SUTA) rate. Most businesses have experienced SUTA increases of two to three times their usual rate. Some companies have experienced a rate increase of four or even five times their 2009 rate.

Our solution is designed for businesses that employ workers on a temporary basis on their own payroll. You can avoid paying the 2010 SUTA tax on your contingency employees by transferring these employees from your payroll to the Integrity Staffing & Solutions payroll at a discounted hourly rate.

Additionally, by reducing the number of unemployment insurance claims against your company this year, you will help lower your 2011 SUTA rate. This can be substantial since you are required annually to pay SUTA on each employee who works on your payroll.

Our solution saves you time, money, and eliminates worry about handling SUTA and all other payroll related expenses for 1099 employees such as FUTA, FICA, and Workers' Compensation Liability Insurance. By transferring them to Integrity Staffing & Solutions, you create a manageable fixed business cost that you can control.

Call Integrity Staffing & Solutions today at 558-2072 to learn more about our SUTA solution. We want to help you maintain a focus on your primary business rather than on administrative processes and, at the same time, benefit your bottom line.
